

Roles and Responsibilities:

Description

The House Rent application consists of three types of users: **Tenant (User)**, **Owner**, and **Admin**. Each user has specific responsibilities and permissions within the system. Tenants search and book rental properties, Owners manage property listings, and Admins oversee the entire platform to ensure smooth and secure operation.

Tenant/User

1. Create an account and securely log in using their email and password.
2. Search for rental properties using filters such as location, rent range, property type, and amenities.
3. View detailed information about available properties, including images, rent amount, and owner contact details.
4. Submit booking requests or schedule property visits for interested properties.
5. Track booking status such as Pending, Confirmed, or Cancelled through their dashboard.
6. View their booking history and manage previous booking requests.
7. Update personal profile information and account settings.

Owner

1. Register an account and obtain approval from the Admin (if owner verification is enabled).
2. Add new property listings with complete details such as title, location, rent amount, amenities, and images.
3. Perform CRUD operations (Create, Read, Update, Delete) on their property listings.
4. Manage property availability and update rental status when a property is booked.
5. View booking requests submitted by tenants.
6. Approve or reject booking requests based on property availability.
7. Monitor all listed properties and maintain accurate property information.

Admin

1. Manage all users, owners, properties, and booking records within the application.
2. Verify and approve owner accounts before they are allowed to list properties.

3. Monitor property listings and remove invalid, duplicate, or inappropriate content.
4. Manage user accounts and take action against fraudulent or suspicious activities.
5. Monitor booking transactions and ensure smooth platform operation.
6. Maintain platform policies, security standards, and data integrity.
7. Generate reports and oversee overall system performance.
